# BOP Handling Systems

## OVERVIEW

For over 30 years Ingersoll Rand has designed, manufactured, and serviced hundreds of Blowout Preventer Handling Systems for all the major drilling contractors and oil companies in the industry.

Our familiarity with this complex and critical lifting application enables us to provide the type of equipment, engineering support, and certifications that these projects require.

The design of our BOP Handling Systems reflects the years of experience we've gained by providing equipment for the harshest environments and applications around the world. Our Oilfield Tough systems feature compact modular designs, robust "bulletproof" gearboxes, powerful air or hydraulic motors, large diameter load chain, and all steel/cast iron construction which provides increased safety, rugged reliability, enhanced control, and reduced maintenance.

Our commitment to safety and quality combined with our long experience with difficult lifting applications allows us to provide our clients with the safest and most cost-effective solutions possible.

## The Ingersoll Rand Advantage

Our BOP Handling Systems are designed to meet or exceed the specifications of one or more of the following regulatory bodies; the Norwegian Petroleum Directorate (NPD), UK HSE, Lloyds Register of Shipping (LRS), Det Norske Veritas (DNV), and American Bureau of Shipping (ABS) for the oilwell drilling industry.

All Ingersoll Rand BOP handling systems are designed and built in ISO9001 certified factories.

Certificate No. FM53539 Certificate No. QUAL/1991/309e

- ❖ **ISO 9001 certified manufacturing and service facilities**
- ❖ **5:1 design factor combined with all steel and cast iron construction** to withstand the brutal environmental and mechanical challenges of the job.
- ❖ **Automatic multi-disc oil bath motor brakes** that engage instantly the moment the controls are released.
- ❖ **High efficiency planetary gearboxes** that are fully sealed to exclude contaminants.
- ❖ **Space saving modular designs** require no deck space, offer low headroom and improved end approach. Ultra-low headroom models are available for applications with severe envelope restrictions.
- ❖ **Air and hydraulic powered models** to choose from, including high-torque radial piston and compact (lube-free) gear type air motors. Air motors provide built-in overload protection since they will stall without damaging hoist.
- ❖ **Smooth, precise, and safe load control** with variable speed pendulum control.
- ❖ **Rugged corrosion resistant load chain** in 16, 22, and 32 mm sizes has greater elongation and therefore, is more resistant to shock loading. The large links provide for easier external inspection, excellent resistance to abrasion, and will last indefinitely when properly maintained.
- ❖ **True vertical lift** which enhances load control characteristics and safety.
- ❖ **Articulated trolleys** accommodate limited side pulling as BOP stack is being lifted.
- ❖ **Engineered options**
  - Rack and pinion trolley drive option for positive traction and improved horizontal load control.
  - Severe duty packages available for cold weather, marine, and explosion-proof environments including ATEX.
  - Remote control pendulums and consoles.
  - Spark and corrosion resistant components.
  - Air and hydraulic festooning systems.
  - Trolleys for custom fabricated beams.
  - Clevis and shackle bottom block assemblies.
  - Low pressure 4 bar (57psi) applications.

200	BS200LCH4P	4	0.36 (1.18)	1901 (74.84)

\*\*All BOP Handling Systems are comprised of two trolley-mounted hoists; each of which is rated at one-half the complete system capacity.

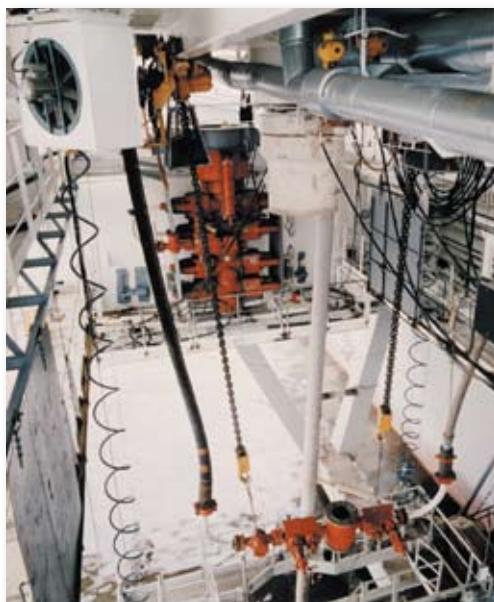

# Hercu-Link™ Air BOP Handling Systems

**STANDARD FEATURES AND OPTIONS** of Piston Motor Drive – 50 to 200 tons Lifting Capacity

**Designed to meet or exceed specifications of one or more of the following regulatory bodies – the Norwegian Petroleum Directorate (NPD), UK HSE, Lloyds Register of Shipping (LRS), Det Norske Veritas (DNV), and American Bureau of Shipping (ABS) for the oilwell drilling industry.**

## Standard Features

- Radial piston air motor – hoist and trolley
- 5:1 design factor
- All steel construction
- Automatic Fail-Safe, multi disc, motor brake on hoist
- Articulated trolley allows limited side pulling operations on special models
- Fully enclosed planetary gear box
- Compact modular design
- Corrosion resistant load chain
- 9m (30 ft) height of lift standard on all models
- Bottom block mounted on bearing with external lubrication point and water drain
- Accu-Trol™ pendant with “emergency stop/start” feature and 9m (30 ft) pendant hose
- Limit switch for upper and lower over-travel protection.
- Lifting lugs for easy installation
- Filter-Lubricator air preparation package mounted on unit
- Corrosion resistant Marine 812 finish paint
- Galvanized steel chain container
- Trolley guide rollers, rubber bumpers, and rail sweeps
- Manufacturer test certificate and maintenance manual
- Exhaust mufflers

BHS50M (50-ton system) after storage of Blowout Preventer for periodic maintenance.

BHS100M (100-ton system) in the process of deploying Blowout Preventer stack

## Options

- Variable lengths of lift and pendant control hose
- Spark and corrosion resistant (S-COR-E) packages
- Rack and pinion trolley drive for positive traction
- Clevis and shackle attachment in lieu of bottom hook
- Air or hydraulic festooning systems
- Trolleys for shipyard fabricated beams
- CE compliant models including overload protection and main emergency stop device
- Corrosion resistant Marine 812-X paint system
- Sandblast and carbozinc (primer only)
- Custom paint coating systems per owners specifications
- Custom designed air control consoles
- 4 bar (57 psi) application models

(1) Without trailing trolley or with articulated trolley.

**WARNING:**

This equipment is not to be used for lifting, supporting or transporting people, or lifting or supporting loads over people.

**Standard Equipment:**

Trolley Bumpers

Limit Switch

Piston Motor Trolley

Corrosion resistant load chain

Galvanized steel chain container

Muffler

Air prep package

Disc brake system

Accu-Trol™  
pendant handle

# Hercu-Link™ Air BOP Handling Systems

**MODEL DRIVER** of Piston Motor Drive – 50 to 200 tons Lifting Capacity

## How to Order

Specify the complete model as shown. Specify beam size, type and flange width.

**Example: BHS50MA6-30-30-KR**

Series	System Capacity	Suspension	Trolley flange adjustment	Control	-	Lift	-	Control drop	-	Options		
BHS	50	M	A	6	-	30	-	30	-	KR		
<b>BHS</b> = Blowout Preventer Handling System		<b>M</b> = Piston Motor Trolley RT = Rack and Pinion Trolley Drive for Tapered Beam Flange RF = Rack and Pinion Trolley Drive for Flat Beam Flange		5 = 1 Mtr. Pendant (2 button w/on-off) <b>6</b> = 2 Mtr. Pendant (4 button w/on-off) 7 = 3 Mtr. Pendant (6 button w/on-off)		XX = Length of lift in feet						
tons lbs # of hoists x cap.			<b>A</b> = standard B = 2" extension C = 4" extension D = 6" extension									
50 = 110,000 (2 x 25 tons) 75 = 165,000 (2 x 37.5 tons) 100 = 220,000 (2 x 50 tons) 150 = 330,000 (2 x 75 tons) 200 = 440,000 (2 x 100 tons)						C1M3 = ABS minus 20 degree C design temperature (tD) C2M3 = DNV minus 20 degree C design temperature (tD) <b>K</b> = Clevis (in place of bottom hook) M1 = Per DIN 50049/EN10204 Para 2.2 "Typicals" M2 = Per DIN 50049/EN10204 Para 3.1b actual per product as purchased M3 = Per DIN 50049/EN10204 Para 3.1b actual per product as delivered in final condition N4 = American Bureau of Shipping "Certification of Drilling Systems" N5 = Det Norske Veritas "DNV-OS-E101 Drilling Plant" P1 = Marine 812-X Paint System P2 = Marine 812-X Paint System (isocyanate free paint system) <b>R</b> = Copper plated (S-COR-E package) The product will be equipped with copper plated load hook(s) and trolley wheels W1 = ABS witness test W2 = DNV witness test W3 = LRS witness test W4 = Customer witness test -CE = Compliance with European Machinery Directive						

### Notes:

**M1** - Material traceability certificates according to EN 10204 (Ex DIN 50049) 2.2 on load bearing parts. This conformity document affirms (by the manufacturer) that parts are in compliance with the requirements of the order based on non-specific inspection and testing (i.e. results are typical material properties for these parts).

**M2** - Material traceability certificates according to EN 10204 (Ex DIN 50049) 3.1b on load bearing parts. These documents affirm (by a department independent of the manufacturing department) that the actual parts used in the product are in compliance with the order based on specific inspection and testing (i.e. results are as-purchased material properties for those parts).

**M3** - Material traceability certificates according to EN 10204 (Ex DIN 50049) 3.1b on load bearing parts. These documents affirm (by a department independent of the manufacturing department) that the actual parts used in the product are in compliance with the order based on specific inspection and testing (i.e. results are actual material properties for those parts in a finished, as delivered condition).

**WARNING:** Standard Hercu-Link™ hoists purchased for B.O.P. Handling Systems will void the warranty. They are not designed for this type of application.

# Liftchain® Air or Hydraulic BOP Handling Systems

**STANDARD FEATURES AND OPTIONS** – 25 to 50 tons Lifting Capacity

**Designed to meet or exceed specifications of one or more of the following regulatory bodies - the Norwegian Petroleum Directorate (NPD), UK HSE, Lloyds Register of Shipping (LRS), Det Norske Veritas (DNV), and American Bureau of Shipping (ABS) for the oilwell drilling industry.**

## Standard Features

- Gear type air motor – hoist and trolley
- 5:1 design factor
- All steel/cast iron construction
- Automatic Fail Safe multi disc, motor brake on hoist and trolley
- Articulated trolley allows limited side pulling operations
- Fully enclosed planetary gear box
- Compact modular design
- Corrosion resistant load chain
- 9m (30 ft) height of lift standard on all models
- Bottom block mounted on bearing with external lubrication point and water drain
- 9m (30 ft) of control (progressive pendent)
- Limit switch for upper and lower over-travel protection.
- Lifting lugs for easy installation
- Filter-Lubricator-Regulator air preparation package mounted on unit
- Corrosion resistant Marine 812 finish paint
- Galvanized steel chain container
- Trolley guide rollers, rubber bumpers, and rail sweeps
- Manufacturer test certificate and maintenance manual
- Exhaust mufflers

BS75LCH3 (2 x 75-ton) hydraulic systems used on a rig

BS75LCA3 (75-ton) air system – 1 hoist shown

## Options

- Variable lengths of lift and pendent control hose
- Spark and corrosion resistant (S-COR-E) packages
- Rack and pinion trolley drive for positive traction
- Clevis and shackle attachment in lieu of bottom hook
- Air or hydraulic festooning systems
- Trolleys for shipyard fabricated beams
- CE compliant models including overload protection and main emergency stop device
- Corrosion resistant Marine 812-X paint system
- Sandblast and carbozinc (primer only)
- Custom paint coating systems per owners specifications
- Custom designed hydraulic and air control consoles

# Liftchain® Air or Hydraulic BOP Handling Systems

**MODEL DRIVER** – 25 to 200 tons Lifting Capacity

## How to Order

Specify the complete model as shown. Specify beam size, type and flange width. Note that 0 (zero) is a number, not a letter in the model part numbers.

**Example:** BS50LCA2P3E9M9T1-E

Series	System Capacity	Hoist Series	Power type	Number of chain falls	Body control type	Control type	Beam type	Lift	Control Options	-	CE Package
<b>BS</b>	<b>50</b>	<b>LC2</b>	<b>A</b>	<b>4</b>	<b>P</b>	<b>3</b>	<b>E</b>	<b>9M</b>	<b>9</b>	<b>T1</b>	<b>-</b>

**BS** = Blowout Preventer Handling System  
**LC2** = Liftchain® LC2 Series  
**A** = Air  
**H** = Hydraulic

**50** = (2 x 25 tons)  
or 50 = (2 x 25 tons)

**25** = (2 x 12.5 tons)  
**30** = (2 x 15 tons)  
**36** = (2 x 18 tons)  
**40** = (2 x 20 tons)  
**75** = (2 x 37.5 tons)  
**100** = (2 x 50 tons)  
**150** = (2 x 75 tons)  
**200** = (2 x 100 tons)

**50** = # of hoists x cap.  
# of hoists x cap.

**Chain falls (# per hoist)**  
2 falls  
3 falls  
3 falls  
4 falls  
2 falls  
4 falls  
3 falls  
4 falls  
3 falls  
4 falls

**4** = 1 fall  
2 = 2 falls  
3 = 3 falls  
**4** = 4 falls

**P** = Pendent  
**F** = Full Flow (hydraulic only)

**3** = 2 motor pendent (\*)  
0 = no control (for hyd.)  
(\*) Joystick type in hyd.

**E** = Flat beam  
**N** = Tapered beam  
Add the letter "R" for Rack & Pinion configuration (e.g. ER)

**9M** = 9 m  
XX = Specify length in meters  
(10 m max in hydraulic)

**9** = 9 m std.  
XX = Specify length in meters

**T1** = Spark resistant package for Zone 1 (\*\*)  
**Z** = Sandblast and carbozinc (primer only)

**-E** = compliance with the EC Machinery Directives (Only for air operated models)\*\*

**\*\*CE package includes:**  
- Overload protection  
- Emergency stop button  
- Main air shut off valve  
- CE declaration of conformity

**L** = Low Temperature rating (TD = -20°C)

**N** = Clevis instead of bottom hook

**QZ** = Marine 812-X paint system

**T1** = Spark resistant package for Zone 1 (\*\*)

**Z** = Sandblast and carbozinc (primer only)

**(\*\*) Spark resistant option T1 includes:**

**> For the hoist:**

- Stainless steel pins and fasteners 10 mm and smaller
- 20µ zinc plated fasteners 11 mm and larger
- Cast iron pendent (air only)
- Bronze coated bottom hook assembly

**> For the trolley:**

- Stainless steel pins and fasteners 10 mm and smaller
- 20µ zinc plated fasteners 11 mm and larger
- Solid bronze wheels
- Cast iron pendent (air only)
